

Solutions for the Digital Evidence Lifecycle®

T35e Forensic SATA/IDE Bridge

The Tableau T35e Forensic SATA/IDE Bridge supports SATA and IDE write-blocked drive acquisitions from one Classic sized product.

Available as read only (T35e), read/write (T35e-RW) or in a Tableau kit (TK35e), this product delivers high performance in a compact, durable, and easy-to-use package.

Recommended Tableau Notebook & ZIF Drive Adapters: TDA5-18, TDA5-25, & TDA5-ZIF.

THE TABLEAU T35e - SETTING A NEW STANDARD IN SATA & IDE WRITE-BLOCKING

Over the past four years, Tableau's Classic Family of Forensic Bridges have become the de facto standard for hardware write-blocker based data acquisitions. The newest Tableau write-blocker, the T35e Forensic SATA/IDE Bridge delivers robust features and performance establishing it as the new standard by which all other write-blocking devices will be measured.

INCREASED IMAGING SPEEDS. REDUCED PRICE.

Built to support SATA and IDE drive imaging from a single Classic-sized package, the T35e delivers performance that blows the doors off other hardware write-blockers. Increases in SATA data transfer rates of up to 60% (benchmarked versus current Classic Products) were measured using a FireWire 800 host interface and readily available third-party imaging tools. The T35e will reduce your data acquisition times and get you to data analysis sooner.

A product this good at a price point less than the T3u SATA and T5 IDE bridges combined? That's right. With an MSRP of \$USD 299, this unit is designed to bring smiles to the faces of forensic examiners and purchasing agents alike.

PROTECTING YOUR INVESTMENT WITH TABLEAU FIRMWARE UPDATES

Tableau's Firmware Update Utility offers unmatched ease-of-use and value. When you purchase a Tableau forensic bridge, you can rely on our firmware updates to deliver high-quality, high-performance, and robust device capability for many years to come.
